Why Study Urban Science and Society?

The urban science and society program is unique in its multidisciplinary nature and its primary focus on cities. Many major issues facing society are complex, multidimensional, and interconnected. They are shaped by a variety of environmental, social, economic, and political factors. In our globalizing and urbanizing world, cities and urban communities have become increasingly important as living environments, centers of economic activities, cultural interaction, politics, and as locations of many social, economic, and environmental problems. This program provides the training and ability to understand the complex urban environment, the challenges and opportunities on a local, regional, and global scale, as well as skills to address them.

Urban Science and Society Career Paths

Employment prospects in fields associated with urban studies are very promising. The major prepares students for careers in many fields in the private, non-profit, and public sectors including education, community service, social work, urban planning, real estate, and public affairs. The multidisciplinary nature of the program also offers a solid foundation for students who wish to pursue graduate studies in a wide range of areas including public policy, education, sociology, criminal justice, public health, public administration, law, and social work.

Major Requirements

The 33-credit degree allows for specialization in one of two concentrations:

- Policy, Planning, and Development
- Community, Culture, and Diversity

Course topics include:

- historical and contemporary patterns of urbanization
- city forms
- urban economic growth and decline
- issues around migration, race, ethnicity, and gender relationships in cities
- types of urban economies
- forms of urban governance
- social movements
- public education
- public health
- housing
- land-use planning
- poverty
- transportation
- crime
- community development
Internship Opportunities

William Paterson University’s location in the northern New Jersey/New York metropolitan area provides students with many opportunities for internships in various private corporations, public and non-profit organizations, and agencies dealing with a wide range of urban-related issues, including:

- housing
- transportation
- education
- real estate
- research
- public health
- community development
- planning
- recreation
- advocacy
- law
- law enforcement
- criminal justice
- business
- lobbying
- data analysis
- counseling
- emergency management
- fundraising and development
- historic preservation
- human services
- social services
- market research and analysis
- program development
- policy analysis
- public relations
- project management
- urban renewal
- travel and tourism planning

Learning Outside the Classroom

In addition to the Internship in Urban Studies, students in the major have many other opportunities for applied experiences, including civic engagement and service learning. The program requires that students complete a civic and community engagement course, and offers a choice of community and civic engagement electives. Students may also conduct a research project through the required Senior Seminar (Capstone) course.

Faculty Expertise

Urban science and society faculty come from a wide variety of disciplines and divisions in the University, including:

- Africana world studies
- anthropology
- business
- criminal justice
- environmental science
- geography
- history
- political science
- psychology
- public health
- sociology
- women’s and gender studies

Professors bring breadth and depth of expertise on urban-related issues and are distinguished in their teaching, research, and community engagement.

Our greatest strength is helping you find yours

At William Paterson, we help students not only reach, but expand their potential and discover abilities they may not have been able to see for themselves. As with other programs at WP, the urban science and society major provides:

- Hands-on experience to enhance career marketability
- Opportunity to get involved in research or scholarly activities with faculty
- Professors who bring real world experience to the classroom
- Chance to work with industry professionals through internships
- State-of-the-art campus facilities
- Civic engagement/service learning opportunities
